Groundhog Day Revisited?

Dear Shauna,

This month I have the great pleasure of welcoming two new associates to Soaring Eagle Institute - Dan Gerry and Jim Masica. We're very excited to have them on board and hope you get an opportunity to meet them soon.

Dan Gerry, Senior Associate, is a long-time colleague and friend who brings a wide range of expertise to our clients. Dan has years of experience in strategic planning, leadership and team development, business systems, process improvement, and facilitation. He is also very experienced in coaching leaders and teams. Dan's latest area of interest is Possibility Thinking, and we are premiering a new seminar on that topic on August 7. Dan will also be coaching entrepreneurs to approach their businesses with a higher level of consciousness so that they keep their entire life in balance while creating a successful business. Dan is available for customized consulting and training interventions as well as for keynotes and conference breakout sessions.

Jim Masica, Associate, is a delightful and creative Laughter Coach. Yes, I said - Laughter Coach! Jim teaches groups and teams of all kinds how to move into a more innovative and positive problem-solving mindset by consciously using laughter to shift their brain chemistry. He teaches that we can CHOOSE laughter, even though there may be nothing humorous or funny happening at the moment. By learning to choose laughter, we are also learning how to better control our mindset. You've got to experience it to really get it! We'd love to discuss setting up a Laughter Playshop for your group or team. Jim is available for customized playshops, keynotes and conference breakout sessions.

Until next time,

Shauna

Breaking out with Possibility Thinking!

Do you sometimes wonder if the Bill Murray movie, "Ground Hog Day", was based on your life?

Does it frequently seem like you are going through the all-too-familiar motions where nothing seems to change?

Getting tired of the same old grind?
It's not just you!

Recent findings from neuroscience are shedding new light on why so many of us feel stuck...
